MAP SECURITY

01291 421 111
map-security.com

MAP Security is a family run business, trading since 2004. We are a specialist distributor of security products covering all areas from CCTV to flood / power failure alert systems.

Based on the border of England / Wales near to Chepstow, we have organically developed strong links to the farming community which has really helped MAP Security become a specialist supplier of security equipment to the rural community.

Our team have hands on experience of all products and this enables us to offer a consultation approach to selecting a product to meet a customers requirement.

We pride ourselves on carrying high stock levels and we offer a next day delivery service. All products are covered by a 12 month warranty.

Why buy from MAP?

1. Southwest's No. 1 Security Distributor
2. £500k of stock
3. 3,000 sq ft warehouse
4. Rural security specialists
5. Full Consultation to assist with the design of a complete system
6. We will price match any reputable supplier
7. Order up to 4pm for next day delivery
8. Same day delivery (20miles of Chepstow)
9. Order by elephone, fax, internet, email.
10. Full Product Demonstrations
11. Small but friendly and knowledgeable team.

- Auto reboot - starts up following power failure.
- Network connection
- Easy Backup - record footage to USB stick
- HDD - Choose HDD - upto 3TB supported!
- Watch via Computer, Tablet or SmartPhone!
- Realtime recording - CIF resolution or D1 6fps
- More detail - With digital 2X zoom
- Motion recording - Record on movement only
- Network support - such as PPPOE and DDNS
- Watermark option for use in court
- Pentaplex facility - Playback video, watch over the internet and backup without disrupting the live recording. All at the same time!!!

AVTECH is in the top three leading manufacturers of CCTV DVR recorders. Manufactured in Taiwan, this ensures the best quality Asian products that utilise Western component manufacturers and not cheap imitation components. BUT where AVTECH really scores is the flawless operation of its software - downloading has never been eaiser, use any smart phone platform and the AVTECH performs with all brands. AVTECH is one of the few manufacturers who plough their profits back into software / apps development - Most other manufacturers use third party apps which means the SW is clunky and never quite runs right.

Whether you puchase the worldwide best selling entry level 674 OR the latest 798PV models, they all use the same software which is a real plus if you are and installer/ regular user. Operation can be done via iR controller, front panel, remote access BUT the best way is to use a USB mouse - total control can be achieved by simply left and right clicking.

Using H264 compression allows full optimisation of a limited bandwidth meaning the screen refresh rate is as close to real time as bandwidth will allow. The included CMS software allows the user to select up to 64 cameras for multiple DVR locations!

Equipment Enclosures and CCTV Accessories

Our RHINO CCTV housing kits provide protection for the camera and cable using an all-new cable-managed bracket. With an integrated cable managed bracket you can bring the cables directly into the housing without them being exposed to vandals or the elements. Fully adjustable, it's easy to lock the new RHINO housing to look in any direction so that you can get the exact shot you want. The RHINO contains a thermostat to switch on the heater only when needed.

Takex External 12m PIR with Voice Speaker - PV-12

This Sensor Speaker is designed to play a message pre-recorded in the internal speech synthesised LSI when the movement of people or vehicles is detected.

Includes a passive infrared sensor to detect the body temperature emitted from a human body or a vehicle, it then triggers the speech synthesis LSI

A wide range of applications are possible such as welcoming messages at building entrances, alarm or warning messages at construction sites and other dangerous areas.

CanCam
HD 720P / Infra Red / Time lapse
PIR / Wireless / Internal / External

ESP's new CanCam allows for recording onto SD cards for easy playback, it features an integral PIR detector, with black infrared illumination and recording of the high resolution images.

Versatile in use, this product can either record video with audio up to HD720P or stills up to 8MP recording directly to the 4GB SD Card supplied, with a capacity for larger cards. Recordings are compatible with windows media player or can be viewed via a TV. Although battery powered, the CanCam has an optional plug-in power supply for more permanent users. it has a 6mm lens and can be either pole or wall mounted.

- For internal or external use
- Battery or 6vdc powered
- PIR or time lapse controlled
- Up to HD720P video resolution
- Up to 8MP still image resolution

£95.00

FakeTV ®

'Auto on' with built-in light sensor

FakeTV is a small electronic device that produces exactly the same sort of light a real television makes. From outside, it looks like someone is home watching TV. FakeTV light mimics the effects of scene changes, color shifts, and on-screen motion.

When you look at a real TV, you see images on the screen. But, when you look at the light it casts in a room, the light melds to a uniform glow that changes with the changing images on the television. Some of that light makes it through the window coverings. When burglars see the light, they generally assume it means that someone must be watching television.

Truly a unique security device of the modern era, this DVR/ Door entry system is wall mounted and performs like a normally wall mounted CCTV recording system, except when the door entry button is depressed, this activates a chime on the monitor and the user can then select to speak with a guest and operate the door release if needed. The cameras are powered directly from the DVR unit keeping cabling minimal. You can add any brand/type of CCTV PAL camera. This is a popular solution for modern high end applications where a "slick fit" is required. The DVR comes with a 500GB Western Digital HDD fitted as standard. Full remote viewing is also possible when used inconjunction with the free ESP App.

THERE IS NO OTHER PRODUCT LIKE THIS ON THE MARKET!

Dakota Alert, Inc. Wireless Security Equipment

Perimeter & Driveway Alarms

The Dakota Alert 2500, is the latest product release, using surface mount electronics to be much more power efficient.

Dakota Alert, Inc. Wireless Security Equipment

WMA-3000E - 900 metre range.

A driveway alarm can be that extra layer of home security that you need, it protects the parameter of your home and will instantly warn you of unwanted intruders. The wireless detectors are battery powered making them very easy to install, the receivers are powered by a wall socket and other battery operated portable units are also available.

The WMA-3000E range is an inexpensive and reliable driveway alarm.

Luptature dolorro vidicatur ma sum sequae con prae cus expellu ptatem dolore magnisci apel inis volum il mil int.

Be made aware of visitors, trespassers or thieves, whether by foot or by vehicle.

DCMA-2500E - 800 metre range.

The wireless signal that is sent to the receiver, in the event of a visitor crossing the perimeter, can be set to silent so that only the owner is made aware or it can be programmed to be audible and/or visual. Multiple detectors can transmit to one receiver, or one detector can transmit to multiple receivers, depending on your individual requirements.

The DCMA-2500 is the latest range from akota Alert, it can be used by homeowners and business owners alike as a driveway alarm, entrance alert, back yard monitor, etc. Installation is very quick and simple, and it can be done by virtually anyone.

YALE SmartHome Alarms

With leading digital door locks, wireless alarm kits, and the Doormaster replacement multipoint lock, Yale is the UK's most trusted name in the locking industry.

The Yale SmartHome Alarm is a professional high end alarm system that puts you firmly in control with new ways to protect your family and property. It combines new technology with the convenience of Yale's wirefree connectivity and the reassurance of a Grade 2 professional system in one future-proof package. Yesterdays on/off alarms are evolving into expandable home security systems that automate your home and put you in control. It combines all this with the very latest technology and the convenience and flexibility of Yale's 868 MHz wirefree connectivity.

Use the optional power controls to turn on a light upstairs when someone triggers the PIR in your back garden – or simply switch on the alarm remotely from your mobile phone. You can even put your own MP3 files up as a door bell with a welcoming tune – or a barking dog!

The System can be fully accessed by using remote dial in...You can check status/ arm/ disarm and using the inline Power switch even turns lights on/off. A unique and particularly smart feature is that the alarm can also be used as a safety device within the home - Sensors can be set so that when activated, they can turn on lights using the inline power switch. Using this feature in conjunction with the Yale external PIR, you can not only protect your driveway but have the area lit at night.

NOTE: These kits can use either a landline OR GSM sim card for remote access. We can offer this identical system with just a basic landline comm feature - See product: ENA-KIT1.
There is no key fob included in the kits even though they're shown in the pictures.

The Control panel has a full voice communicating system taking you through day to day operations.

The YSA allows the addition of up to 80 sensors/zones. In addition, the system can control 2 properties entirely separately making it very attractive for dual occupancy properties OR even flats.

- Grade 2 Professional Alarm
- Designated Frequency.
- Control Electrical Appliances Remotely.
- Suitable for Small OR large Properties.
- Full Remote Access.
- Available with Pet friendly PIRs
- Optional GSM Card Plug-in module.

Each PAck contains all fixtures & Batteries

XL Wireless Fuel Tank Tilt Switch System

£65

This system has a Wireless range of 80 metres, the Receiver plugs into a standard 13-amp wall socket and has a built in 100 Db Siren, the receiver can also trigger additional sirens, a telephone dialer or a timer switch. The Receiver uses 4 x AAA batteries in the event of a power cut.

The Tilt Switch Detector is powered by a 3v lithium coin battery and is supplied with an additional plastic housing box to increase weather & damp protection. Attach the protective plastic box to the underneath of the fuel tank lid using either double sided tape or self tapping screws, the battery powered tilt switch simply fits into this box.

XL Wireless Fuel Tank Vibration System

This system has the same features as above except the tilt switch is replaced with a vibration detector.

£65

The Vibration Detector is powered by a 3v lithium coin battery and is supplied with an additional plastic housing box to increase weather & damp protection, we recommend the lid is fastened down to make sure the vibration switch is activated.

WG Wireless Fuel Tank Vibration Alarm System with Built in Dialer

£60

This Wireless Alarm System can be programmed to supply an Audible Beep, 110 Db Siren or Telephone Call or all three. Up to 32 mixed accessories can be used with this versatile Wireless Alarm System making it possible to also use the system as a Staff Protection Alarm, Flood Alarm, Smoke Alarm, Power Failure, Door Entry Alert & Intruder Alarm.

The Battery Powered Wireless Vibration Sensor & Transmitter is typically located underneath a screw cap on a fuel tank by 4 self tapping screws, provided the lid has been closed tightly the vibration switch will activate when the lid is first opened, this point a Wireless Signal will be transmitted to the Alarm Receiver which will then activate a Siren (optional) and contact Key Holders by telephone.

WG Wireless Fuel Tank Magnetic Contact Alarm System with Built in Dialer

This system has the same features as above except sensor is replaced with a magnetic sensor.

£60

The Magnetic Detector is powered by a 3v lithium coin battery and is supplied with an additional plastic housing box to increase weather & damp protection, we recommend the lid is fastened down to make sure the vibration switch is activated.

## External Solar Charged Pet Friendly KP Mini Wireless GSM Fuel Tank Alarm System

This External Pet Friendly Solar Charged PIR & KP Mini GSM Fuel Tank Alarm System, is ideal for protecting the valuable heating oil in your Fuel Tank, it has a detection range of up to 12 metres and will transmit up to 100 metres (line of sight) back to the receiver.

£245

The small solar panel on the top of the PIR will charge and maintain the integral AAA Ni-MH battery pack in normal day light, it can also be turned to face the direction that provides the most light, the main body of the PIR also incorporates a tamper switch, so in the unlikely event of an intruder gaining access to the inside, the PIR will send a tamper signal and a siren will be heard back at the alarm control panel.
